The freshwater resources throughout the world have been deteriorated during the last decades. Many Asian and African cities suffer from the shortage of clean freshwater.

Water Scarcity Action Force aims to address freshwater issues by

- Developing water infrastructures in the most vulnerable areas
- Maintaining riverine systems
- Improving the freshwater quality in polluted water bodies
- Conducting research in hydrology and water resources

## Field projects

Construction of ditches and canals in Sudan Village in central Sudan to provide residents with drinking water.

River dredging in Wang Nam Khiao Town in Thailand for safe sailing and riverine system maintenance.

Trough construction in Sistan province in Iran for endangered species.

## Research projects

Algae: The Baltic Sea Monster. This project aimed to discover the causes, effects and solutions for Baltic Sea pollution.

Oil spill detection, This project aimed to detect oil spills in Persian Gulf by using satellite Radar images.

Assessment of the possibilities of tide mills in Atlantic Ocean to produce clean energy.
